

ENVIRONMENTAL POLICY

At Ashtree Vision & Safety Ltd we acknowledge that we have a duty to protect the wider environment and reduce our environmental impacts and pollution, both direct and indirect, whenever practically possible. Our manufacturing facility produces many thousands of pieces of vehicle safety equipment each year and we recognise that the development of an environmentally friendly culture, which is supportive and pro-active, is essential to achieve adequate control (and subsequent reduction) over our environmental impacts and reduce associated risks.

Our strategy to achieve this as an organisation relies on the following: -

- A commitment to protect the environment through the implementation of an Environmental Management System to ISO14001 conformance levels as a minimum.
- Compliance with all applicable environmental obligations, legislation and regulations.
- Identification and annual review of company activities which have environmental impacts.
- A continual, systematic programme of objective and target setting to reduce those impacts regarded as significant.
- Protection of bio-diversity and ecosystems by minimising waste and emission release.
- Climate change mitigation by efficient production and energy management.
- Providing information and training to our employees so they can participate fully in the environmental objectives of the company.
- Sustainable resource management by working with our supply chain, both customers and suppliers, to reduce the environmental impacts of the procurement, production, use and final disposal of our products.

Signed

Managing Director, Ashtree Vision & Safety Ltd
