

# Mirror Glass

After a few years of simply importing and distributing glasses Ashtree made a decision to open a dedicated glass cutting department in 1982. It's quite a grand title but at the time it was only one person who cut the glass using manual glass cutting equipment. It's all changed since then. We now have three automatic glass cutting machines as well as a semi automatic machine for cutting deep radius glass.

After the glass has been cut it is shatter proofed to European Union standards using the automated glass taping machine that we had specially built for the job.

The following pages show the standard range of glasses that we keep in stock. We can also cut glass to customers requirements, subject to minimum quantities.

# Heating Elements

## HEATING ELEMENTS

The Ashtree range of heating elements are designed to cover the largest possible range of heated mirrors currently in use. All elements are 24 volt but 12 volt versions are also available in certain sizes.
